

# Upper Canada FHT – D2D Patient Served Indicator in Nightingale On Demand

---

**AFHTO D2D Patient Served: Number of unique patients in the EMR who have had a visit (i.e. appointment) in the past 3 years.**

In Data Miner Module create new Standard Report

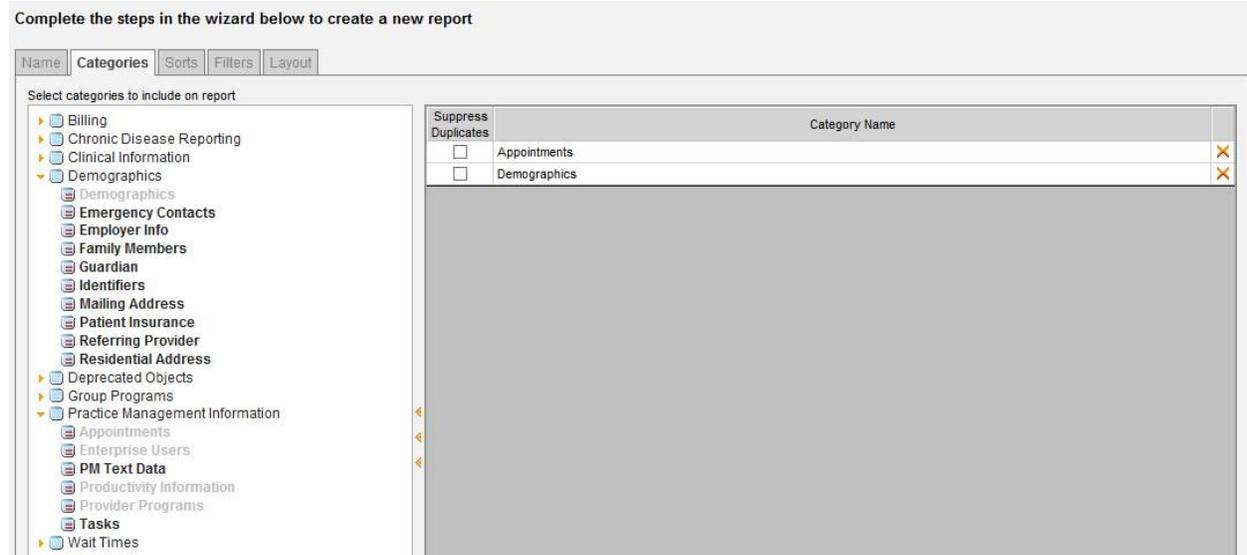

Name your report (Suggested name *D2D Patient Served v1*) and file it in required folder and then click Next:

# Upper Canada FHT – D2D Patient Served Indicator in Nightingale On Demand

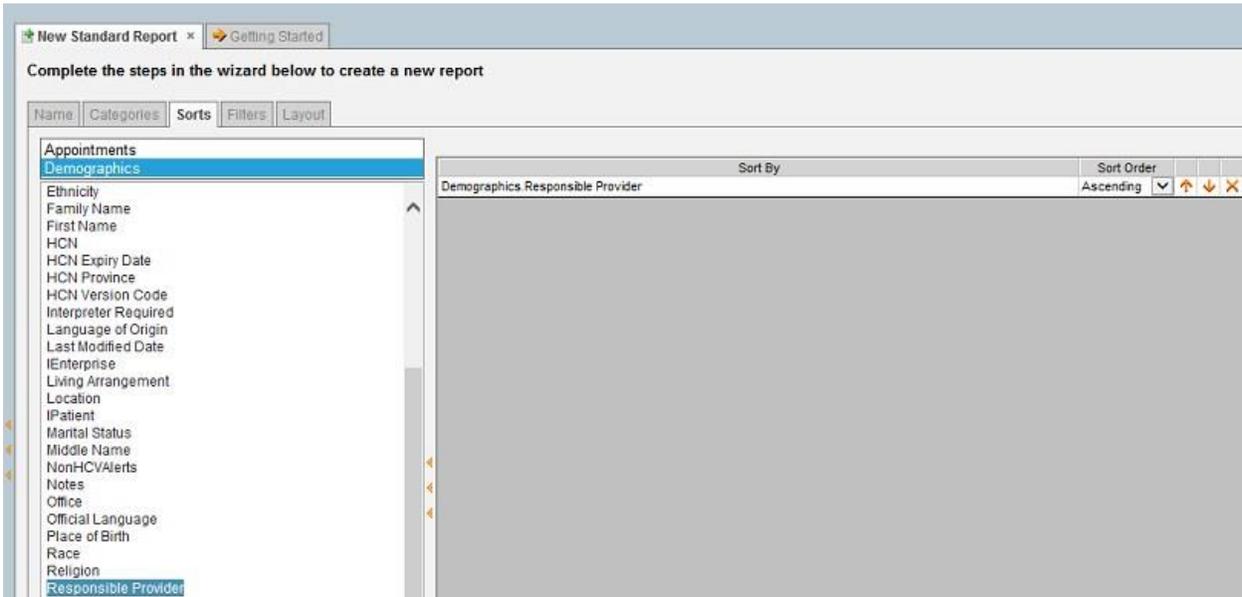

**Categories:** Select (double click or drag and drop the category) and then click Next:

- Practice Management Information → Appointments
- Demographics → Demographics

**Sort:** Can sort based on any parameter, in this example we used “Responsible Provider”. Select your sort parameter and then click Next.

**NOTE:** We selected Responsible Provider as the sort because we typically review our data per provider and for the entire group. This is an internal practice for Upper Canada FHT and not necessary for D2D.

# Upper Canada FHT – D2D Patient Served Indicator in Nightingale On Demand

**Filters:** Select Appointments from the drop down and then either double click or drag and drop Appointment Date into “Filter By” area.

In the filter details below;

- Change the first drop down to “Is Between”
- Then click on the calendar beside the first date box and select the appropriate start date (oldest date)
- Then click on the calendar beside the second date box and select the appropriate end date (most recent date)

**TIP:** Ensure that the Summary box at the bottom reflects the dates that you have selected. Sometimes when changing the date you need to click in the date box area to “force” the change in the Summary.

**TIP:** If running this report regularly for different date ranges put a check in the “Prompt for Value” so that you don’t have to go back into the filters to make changes. When you run the report, it will prompt you to enter the date ranges you want.

Then click Next.

The screenshot shows the 'Filters' step of a report wizard. On the left, a list of fields is available for selection, with 'Appointment Date' highlighted. On the right, the 'Filter By' area contains 'Appointments.Appointment Date'. Below this, the filter configuration is shown with a red border:

- Operator: Is Between
- Start Date: 2012-10-01
- Operator: AND With Next Filter
- End Date: 2015-10-01
- Operator: And
- Group With Next Filter:
- Prompt For Value:

At the bottom, the 'SUMMARY' box displays: 'Appointments.Appointment Date Is Between '2012-10-01' And '2015-10-01''

**Layout:** Click the drop down (see red arrow below) and select the required category. Either double click or drag and drop the required output fields. For this search we selected the following:

- Demographics ○ Chart Number ○ Chart Status ○ Responsible Provider
- Appointments ○ Appointment Date ○ Appointment Status

Once you have selected all of your outputs click Finish in the bottom right corner

New Standard Report x Getting Started ?

## Additional Settings and Functions:

Click the Drop down on the Report Options icon  and select Advanced.

If there are any ticks in either of the boxes below, remove (ensure both boxes are unticked) and then click OK.

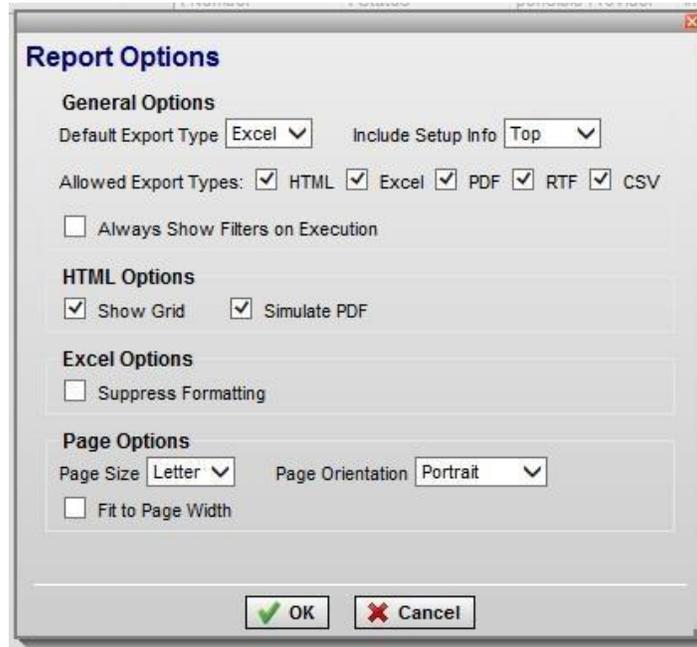

Click the Drop down on the Report options icon  and select Options

# Upper Canada FHT – D2D Patient Served Indicator in Nightingale On Demand

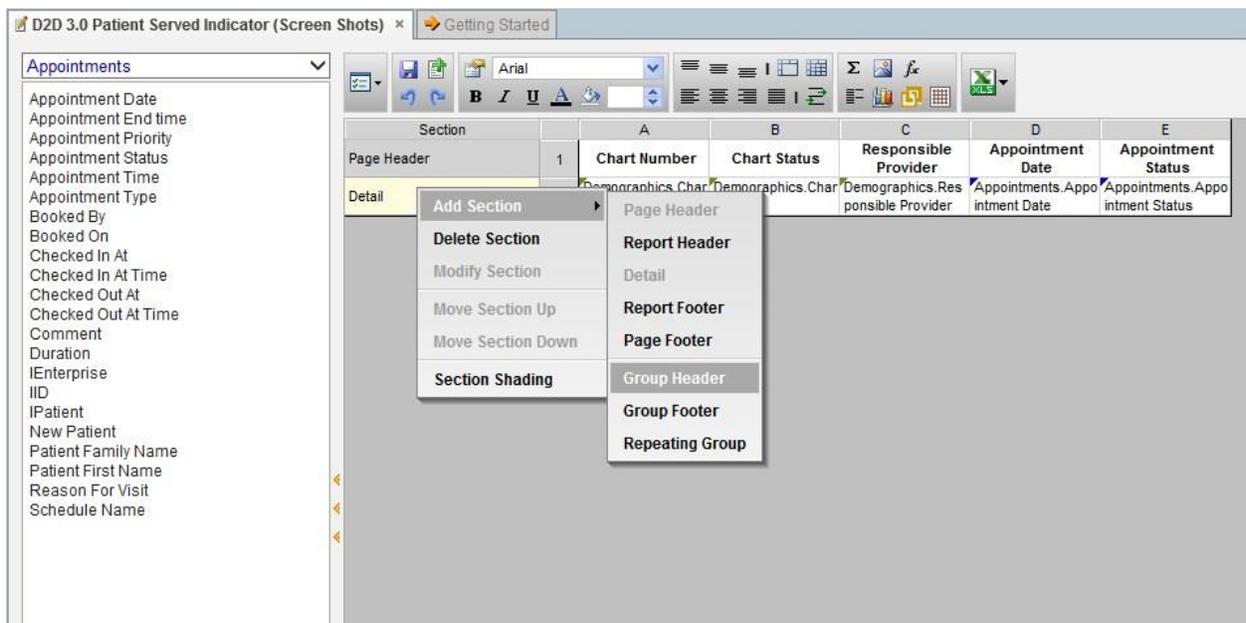

Change the Default Export Type to “Excel” and Include Setup Info to “Top” and then click OK

**TIP:** If you want the Export Type in something other than Excel either leave this option blank or select the appropriate type (Options are HTML, XLS, RTF and CSV).

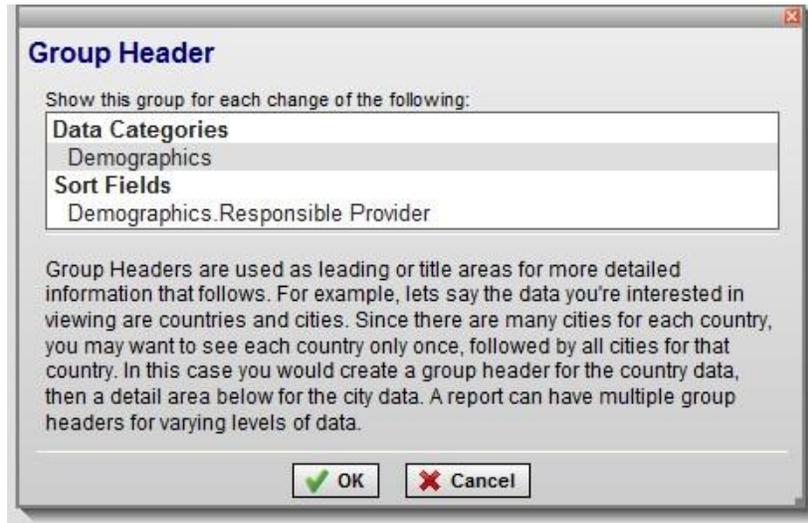

To identify the “Unique Patients”:

Click on Detail box, click Add Section and then Group Header.

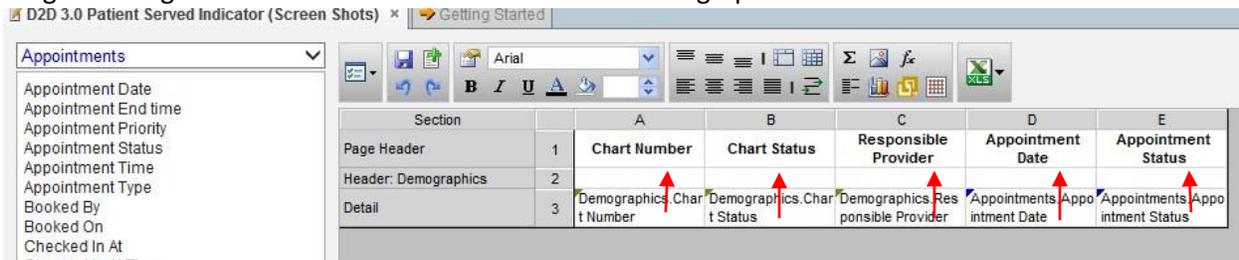

In Group Header box under Data Categories select Demographics and then click OK.

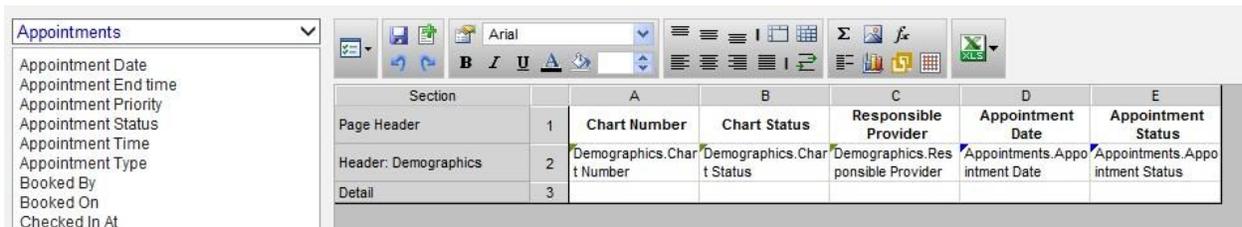

# Upper Canada FHT – D2D Patient Served Indicator in Nightingale On Demand

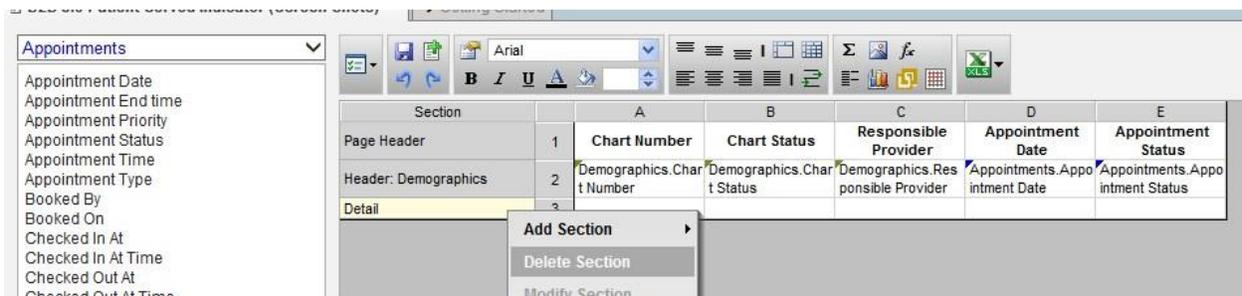

Drag the categories in the Details row to the Header Demographics

It should look like this:

Click on Detail again and select Delete Selection

Click the Save icon  to save the report. When complete click the Excel icon  to run the report.

# Upper Canada FHT – D2D Patient Served Indicator in Nightingale On Demand

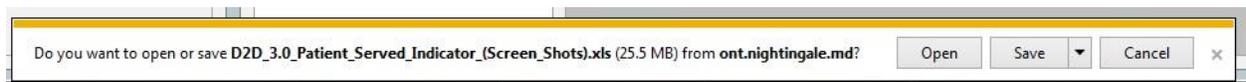

The screenshot shows the Microsoft Excel ribbon with the font set to Arial, size 8. Below the ribbon is a table representing the report header:

Section		A	B	C	D	E
Page Header	1	Chart Number	Chart Status	Responsible Provider	Appointment Date	Appointment Status
Header: Demographics	2	Demographics.Chart Number	Demographics.Chart Status	Demographics.Responsible Provider	Appointments.Appointment Date	Appointments.Appointment Status

The Report filters that were set to “Prompt for Value” will pop up. Update date range appropriately and click OK.

The screenshot shows the 'Report Filters' dialog box. The 'Filter By' field is set to 'Appointments.Appointment Date'. The filter criteria are 'Is Between' with dates '2012-10-01' and '2015-10-01'. The 'AND With Next Filter' checkbox is checked. The 'SUMMARY' section displays: 'Appointments.Appointment Date Is Between '2012-10-01' And '2015-10-01''. The 'OK' button is highlighted.

Depending on this size of your database the report may take a few minutes to process. Once the report is done there will be a prompt to Open or Save, click Open. The report will open in Microsoft Excel.

Report in Microsoft Excel:

- Verify the Setup Information is accurate.

## Upper Canada FHT – D2D Patient Served Indicator in Nightingale On Demand

---

- Delete the Setup information if not needed (or move to another sheet for reference).

Upper Canada FHT Filters:

- Appointment Status (All FHT's should filter out no shows)  "No Show"  "Auto No Show"
- Chart Status  Billing Only  OST  Test

**NOTE:** Items to remove will be specific to each organization. There are other features and functions within Data Miner to filter out Appointment Statuses and Chart Status however in our experience the less you try to ask the report to do the less likely it is to fail. We find it easier to manipulate the data in Microsoft Excel.

The number left should reflect the **Number of unique patients in the EMR who have had a visit (i.e. appointment) in the past 3 years.**
